Universal Health Coverage

Investing in health: an economic imperative for sustainable development

High priority, evidenced-based, cost-effective, health interventions exist; research has demonstrated that implementation of these interventions would result in a 'convergence' of health outcomes between developed and developing countries within a generation. This forum will explore the financing of investing in health and ask Commonwealth Health Ministers to define their own set of high priority services and to universally implement these with public financing from national budgets with contributions, if necessary, from the international community.

PROGRAM Saturday 16 May 2015

1500-1510	Welcome Mr Vijay Krishnarayan Director, Commonwealth Foundation
